# MISO ANNOUNCES POTENTIAL FOR ROLLING BLACKOUTS

By Jerry Sorenson, General Manager

Our local power lines are part of a larger, regional grid operated by the Midcontinent Independent System Operator (MISO). Being part of MISO means Dairyland Power Cooperative (our wholesale power provider) has access to additional power generation resources throughout MISO's territory, which extends from Manitoba, Canada, south through 15 U.S. states to Louisiana. MISO allows Dairyland options to purchase the most cost-effective power throughout the day (Dairyland also sells the power it generates into the MISO market). It also means events that might cause a high demand for electricity in other parts of MISO's territory can affect electricity prices in our region.

MISO predicts power shortages this summer during times of peak demand due to two predominant factors: 1) There is an increase in electricity usage as the effects of the COVID-19 pandemic ease and 2) the retirement of generators is faster than the pace of adding new energy resources. New generation resources being built are intermittent wind and solar, which are not always available when we need them. MISO's Executive Director Zak Joudi recently stated, "MISO's northern and central region is at heightened risk for controlled 'load sheds,' or planned blackouts."

If the power grid is nearing capacity, the first action will be requesting members to begin "Peak Alert" conservation measures such as limiting the use of air conditioning. These measures take some pressure off the grid to help keep the lights on and help avoid blackouts. **Individuals who rely on electrically powered oxygen or other medical equipment should always**

**have their own personal backup plan for coping with power outages and other potential emergencies. While we work hard to provide reliable electric service, we cannot guarantee the power will never fail. If your life or the life of a loved one depends on electricity, you need to develop a personal emergency response plan.**

Riverland Energy has an emergency load reduction plan in place to help eliminate generation capacity shortage that will be implemented if we need to.

Riverland Energy also has a load management program to support these efforts. Load management is most commonly used to help lower cooperative costs by reducing energy use when the price for electricity is high. Load management can also be used to help maintain balance on the power grid. If we are unable to meet our load reduction goals, rolling blackouts will occur. If there is a severe risk of imbalance, members may be notified of an immediate need to reduce electricity use to help avoid rolling blackouts. This scenario is a Maximum Generation (Max Gen) Event.

## Why does a Maximum Generation Event occur?

Max Gen Events occur due to a shortage of generation resources. In other words, the amount of electricity available on the grid is critical and may not be able to meet the demand for electricity. This could occur for multiple reasons:

- Extreme temperatures
- Severe weather conditions
- Generation resources (power plants, solar/wind facilities, etc.) are unexpectedly offline or unavailable
- Higher-than-projected need for electricity
- Other circumstances

## What should members do?

If notified of a Max Gen Event,

Riverland Energy's load management program may be activated outside of normal program hours. This could happen with minimal advance notice.

Members who do not participate in a load management program can still help:

- Turn off lights, televisions, electronics, and other appliances
- Cook food in a microwave instead of using a stovetop or oven
- Adjust your thermostat up or down, depending on the season
- Shift laundry, vacuuming, and running the dishwasher until after the Max Gen Event has ended
- Delay electric vehicle charging until after the Max Gen Event

A Max Gen Event does not mean the load management program will be activated. The Event may be cancelled before MISO reaches that stage. However, if energy prices are high after the Max Gen Event ends, load management may still be used to help control costs.

Members are notified of any alerts by social media, website, local radio stations, and other local media. You can find more information about load management on our website at [www.riverlandenergy.com](http://www.riverlandenergy.com).

Available power generation within the regional grid is being closely monitored.

Members may be asked to reduce non-essential electricity use.

We will post updates as we learn more.

# Congratulations!

## 2022 SCHOLARSHIP RECIPIENTS

In an effort to help area high school seniors pursue their lifelong career goals, Riverland Energy Cooperative recently awarded 32 \$1,000 scholarships to students who are seeking to advance their education beyond the high school level. The monies from these scholarships are made available by unclaimed capital credits from former members. The recipients were selected in a random drawing at the cooperative's annual meeting on Saturday, March 26.

# BE PREPARED FOR SUMMER STORMS AND POWER OUTAGES

Summer storms are always a threat. If you experience an outage, check to see that the power issue is not on your side of the electric meter. Check fuses and circuit breakers in your home.

When calling in an outage, please have this information available:

- Your account number
- Name on the electric account
- Service address where outage is occurring
- Phone number on the account
- Cause of outage if known

If you call after business hours or during widespread outage our call center, Cooperative Response Center (CRC), will answer and assist you. During widespread outages, power is restored systematically. Attention is given first to substations and main feeder lines, followed by individual members.

## Three ways to report an outage:

- **Call** 800-927-6206. After hours: Press #1 to report it via automatic phone recorder, or press #3 to talk to someone.
- **Text** in your outage at 55050. (Must be signed up for outage texting)
- **Online** through SmartHub. Login and follow the prompts for outage reporting and the information will automatically be sent to the dispatch team

## High-Volume Call Answering System

Our high-volume automated call answering system (automatic phone recorders) helps relay problems to our staff quickly and effectively during

major interruptions. This system helps us pinpoint issues during major events which allows us to more efficiently dispatch crews. Although the automated system can be frustrating at times, it allows us to take a high volume of calls in a short amount of time. We, as would you, prefer direct contact during outage

situations. However, during periods of high call volume, our automated system collects outage information, thereby allowing REC staff to focus on restoring your power.

You can view current outages on our live outage map online at [www.riverlandenergy.com](http://www.riverlandenergy.com).

## CONGRATS, MAY PHOTO CONTEST WINNER

Congratulations to Hillary V. for getting the most votes for our April photo contest of "Best of Spring."

Submit your best photo and encourage your friends to vote! The photo receiving most votes will win a \$25 electric bill credit and will be printed in our magazine, along with a few other favorites. By entering, you will also be entered into a drawing for a \$250 electric bill credit.

The June theme is **Water** (think: pool, ocean, river, water sports). Photos can be submitted through June 25. Go to our Facebook page or website to submit and vote.

Some of our other favorite photos submitted for the April Photo Contest:

Left: Strawberry picking – Cathy A.

Above: The wings of hope and all of its beauty – Kendra B.

Below left: A promise of spring – Lois O.

Below: Spring Color – Michelle M.

## Practice Storm Safety

Have a plan in place and make a storm kit.

Listen to local alerts and know where to shelter.

Stay off the roads if trees and power lines are down.

# DO YOU HAVE CAPITAL CREDITS TO CLAIM?

Listed below are the names of members who are entitled to capital credit refunds. Riverland Energy would like to return capital credits to those who earned them; otherwise, the unclaimed capital credits will be forfeited and assigned to the Federated Youth Foundation. These funds are then used in the cooperative's scholarship and education programs. Claims may be sent to the cooperative by email to [bmathson@riverlandenergy.com](mailto:bmathson@riverlandenergy.com), by mail, or by calling 800-411-9115.

Pursuant to Wisconsin Statutes Section 185.03 (10), you are hereby notified that Riverland Energy Cooperative of Arcadia, Wisconsin, has in its possession unclaimed funds belonging to you. You may claim these funds on or before September 25, 2022. You are further notified that unless you do claim such funds and provide satisfactory evidence of your right to receive the same, these funds will be forfeited to the cooperative.
